ABOUT ME

Hey, I'm a Frontend Developer who's on a mission to turn bugs into extinct species. The harder the issue is, the more stubborn and focused I become. Having to work on a project on my own is nothing new nor frightening. Always in the mood to meet new people. If you like dark humor, I like you.

FAMILIAR WITH

- HTML
- CSS
- SCSS
- JavaScript
- TypeScript
- Node.js

- **Java Web Developer**
IT Academy (Belgrade) 2017 - 2018

EXPERIENCE

- **Polazak**
Frontend developer November 2022 - Present
 - Polazak an eCommerce platform for bus ticket sales built with Next.js, React, TypeScript and Material UI.
 - Collaborated with a small team.
 - Redesigned the entire main app, focusing on a mobile-first approach and extending compatibility to tablet and desktop devices.
 - Addressed and fixed direct payment options, and implemented security headers for enhanced data protection.
 - Mentored an intern frontend developer, providing guidance on best practices and assisting with project-specific challenges.
 - Developed numerous new features and fixed existing bugs, contributing to the overall improvement of the platform.
 - Managed complex business logic with limited documentation, relying on daily client meetings for insights and requirements.
 - Implemented crucial fixes and enhancements on the admin dashboard and the external admin dashboard for partners.
 - Improved SEO by leveraging Google Lighthouse and Unlighthouse CLI for performance audits
 - Enhanced existing widgets for external partners, enabling integration and utilization on their websites.
 - Implemented Google Analytic, Google Maps and Google reCaptcha.
 - Undertook the challenging task of enhancing overall quality and performance of the platform.

Treasury
Frontend developer

February 2023 - May 2023

- Collaborated on a treasury desktop application project built in Vue.js, working with an external team to meet a challenging 3-month deadline.
- Played a key role in the development of new features, including the denominational structure and transfer functionalities.
- Acted as a valuable knowledge resource, leveraging prior experience in banking systems to assist frontend colleagues.
- Worked closely with backend developers, particularly on transaction-related features.
- Participating in monthly client presentations to showcase project progress and discuss completed features.

Etoninstitute
Frontend developer

July 2022 - April 2023

- eCommerce application utilizing Nuxt.js and Vue.js, integrated with WordPress CMS on the backend.
- Optimized one of the site's slowest pages, reducing its load time by 67%, despite the heavy data load.
- Collaborated closely with a small team, ensuring effective communication and coordination.
- Addressed maintenance tasks and new feature development for the app.
- Conducted bug fixes and improvements, resolving critical issues to enhance application performance.
- Successfully implemented crucial features such as 'Forgot Password,' optimized mobile-first experiences, and created a user-friendly 'My Account' page post-login.
- Contributed to the implementation of i18n for Arabic across the entire site, enhancing accessibility and multilingual capabilities.
- Implemented SEO for Arabic content, collaborating with the external SEO team to improve visibility and search engine performance.
- Managed route redirections to enhance user navigation and improve overall website performance.
- Actively participated in client meetings, ensuring alignment with client requirements and expectations.

Payment institution
Frontend developer

May 2022 - November 2022

- Maintained a desktop application utilizing Vue.js.
- Implemented multiple new features related to banking systems, contributing to the enhancement of the application's functionality.
- Participated actively in client meetings to understand requirements, provide updates, and gather feedback for continuous improvement.
- Collaborated with cross-functional teams, ensuring effective communication and coordination.

Badin soft
Frontend developer

March 2022 - June 2022

- Teamed up with fellow devs, designers, QA, and our lead to build the whole website from scratch. We used HTML, SCSS, and JavaScript to make it look and feel great.
- Helped set up tools like WebPack and Gulp to make our work easier and better organized.
- Contributed to the integration of new features, enhancing the overall user experience.
- Participated in team meetings and discussions, sharing ideas to improve the overall project.
